Instructions.

The picture for the inside of the game is glued to the base.

The base is glued to the centre with PVA

The centre is fixed to the clear acrylic cover with double sided tape AFTER drilling recesses for the ball bearings and INSERTING the ball bearings.

The coloured cover with hole is fixed to the clear acrylic with double sided tape.

The chosen shape is then marked onto the base, cut out with a coping saw, filed and smoothed to finish with glasspaper.
