

Room Design Sheet

Room Name _____

Colour in these squares to create a layout for your game room.

This sheet will help you to design a room which is 640 x 480 pixels in size and made up of 20 x 15 object blocks. This is the default size for Game Maker rooms.

You could draw your game objects in the room or use codes and symbols to represent them. If you do this, make a key on the other side of this sheet.

Make sure that it is possible to move around the room and reach the necessary objects in the game.
